

Filip Stojkovski

A great combination of technical depth and people skills. Coming from years of experience as a developer I can deeply understand the everyday challenges and opportunities for development teams.. In my current role I lead a development team of 8 team members and collaborate with crossfunctional teams. I have been fortunate to have worked with brands like: Snusbolaget, Apohem, Flygbussarna, Elon, Unisport, Aarke, Zoo, Edblad, Epiroc etc.

Work Experience

Apr 2025 - current

E-commerce Tech Lead - Snusbolaget

I am part of the Product Owners team responsible for the US market, translating business needs to actionable implementation plans for the development team. Aligning strategy and coordinating technical rollouts with the organizations cross functional teams. In the highly regulated Nicotine Industry and high growth market, legal compliance, quality and scalability have been key aspects of my work. I have led multiple high impact projects like for example the platform migration in 2025 from Adobe Commerce to Open Source that improved site performance across the site ranging from 7% to 16% and eliminated licence fees for the business. Architected a custom automated calls solution that freed Customer Service working hours equivalent to a full work day every week and still scaling. Driving a checkout redesign project, warehouse API integration project, proactively identifying tech and processes improvements etc.
